/* =====
data.js - SINGLE SOURCE OF TRUTH for the whole site
-----
Everything you are likely to want to change lives here:
- site name / logo size
- which sections exist, their color + icon
- the navigation menu structure (top buttons + dropdown items)
- every piece of text in Arabic / English / Swedish
- the sample news items for each section

You should NOT need to touch index.html, pages/category.html,
style.css or script.js for everyday content changes.
Colors themselves (the actual hex values) live at the top of style.css
in one ":root" block, also easy to find and edit.

ShirwaniWorldPulse/icons/README.txt

Simple generic line icons (SVG, use currentColor) - one per section.
Safe to replace with your own icon files any time; just keep the same
filenames referenced in data.js, or update the ICONS map in data.js.

ShirwaniWorldPulse/images/README.txt

Put future images here (e.g. logo.png, article photos).

To use a real logo image instead of the text-based logo:

1. Add your file, e.g. images/logo.png
2. In index.html and pages/category.html, replace the element with:

 (use "images/logo.png" with no "../" in index.html, since it lives at the project root; use "../images/logo.png" inside pages/category.html)
3. The box is already sized correctly by SITE.logoWidth / SITE.logoHeight in data.js – the image will fit without stretching.

ShirwaniWorldPulse/NEWS_RSS_IMPLEMENTATION.txt

ShirwaniWorldPulse - Live RSS integration

Integrated from the supplied RSS implementation notes.

Changed: data.js, script.js

Preserved: index.html, pages/category.html, style.css, icons, images and existing site structure.

RSS engine: uses the supplied rss2json approach, category-specific feeds, multilingual feed configuration, deduplication, image extraction, source attribution, original article links, and static fallback content when a feed is temporarily unavailable.

ShirwaniWorldPulse/news-cache.js

/* =====
data.js - SINGLE SOURCE OF TRUTH for the whole site
-----
Everything you are likely to want to change lives here:
- site name / logo size
- which sections exist, their color + icon
- the navigation menu structure (top buttons + dropdown items)
- every piece of text in Arabic / English / Swedish
- the sample news items for each section

You should NOT need to touch index.html, pages/category.html,
style.css or script.js for everyday content changes.
Colors themselves (the actual hex values) live at the top of style.css
in one ":root" block, also easy to find and edit.

ShirwaniWorldPulse - Live RSS integration

Integrated from the supplied RSS implementation notes.

Changed: data.js, script.js

Preserved: index.html, pages/category.html, style.css, icons, images and existing site structure.

RSS engine: uses the supplied rss2json approach, category-specific feeds, multilingual feed configuration, deduplication, image extraction, source attribution, original article links, and static fallback content when a feed is temporarily unavailable.
